

INTERNATIONAL CHALLENGE DAY

Hop, skip and jump to fitness

IT is cheap, easy and good for your health.

Children do it in playgrounds across the world. Some adults consider it a crucial part of their training. Fitness and sports buffs add it to their workout routines.

Skipping has even earned itself a place as the theme of today's third annual International Challenge Day in Hong Kong.

"All you need is a pair of sneakers and a string and you can jump," said Dr Amy Ha, senior instructor in the Department of Sports Sciences and Physical Education at the Chinese University of Hong Kong.

"You don't need much space and this is very important to people who live in Hong Kong because we don't have much anyway."

Dr Ha and her fellow instructor, Daniel Chan Wan-ka, have developed some skipping styles for this year's International Challenge Day.

Last year's theme was "arts". The previous year it was "workercize".

When this year's theme was chosen, the chairman of the ICD steering committee approached the instructors for their expertise.

Mi Chan created an easy-to-read pamphlet on skipping that will be handed out to the public in the hope of encouraging people to exercise for at least 15 minutes every day.

The pair also trained a team of 21 first-year Bachelor of Education students to demonstrate skipping routines at the ICD launch opening ceremonies, closing

ceremonies and two Government functions.

"Through this demonstration, we want to promote regular physical activity," Dr Ha said.

"So far, in Hong Kong, people are not aware of the importance of physical activity."

Skipping is popular with people training for basketball, volleyball and boxing.

It requires hand-foot co-ordination, muscle strength and endurance.

Dr Ha did a lot of skipping while attending Springfield College, the birthplace in the United States of basketball.

"We did a lot of jumping," she recalled. "We were made to do it for 15 minutes before each practice."

Mr Chan, who went to university in Taiwan, said skipping was extremely popular there.

Some secondary schools in Taiwan included skipping in their physical education lessons and it was also used in traditional programmes to introduce Chinese martial arts.

The beauty of skipping was that it could be performed as either solitary or group exercise, Dr Ha said.

It could be enjoyed by children or beginners, or it could be made more challenging for professional athletes.

"The most important thing is to train your co-ordination and your agility," Dr Ha said.

"It's a whole body activity which can strengthen your metabolic rate and your bone fluid, which is good for health."

Getting fit was "the

cheapest way to keep healthy", she said.

People can spend a few dollars for cotton or plastic ropes from toy stores, or pay more for better quality leather ropes from sports shops.

The colourful skipping brochure produced for ICD, which comes complete with illustrations, outlines the benefits of the sport and offers tips on choosing a rope and running shoes, describes how to warm up and cool down, and stresses the importance of good posture.

The Chinese University students in the skipping team gave demonstrations at the ICD launch on May 6 at Sha Tin Town Hall Plaza, at the opening ceremonies at Tai Po Sports Ground last Sunday and at several Government functions.

They are scheduled to perform at today's closing ceremony at 7 pm at Sha Tau Road playground in Tsuen Wan.

"All the students seem to be glad to be involved in community service," Dr Ha said.

"We are not just training the students on the campus, we get to go out and do something for the community."

The students are the first full-time class working towards their new Bachelor of Education degrees at the university.

Their two instructors hope the students will take part in International Challenge Day and embrace exercise as part of their daily lives. But skipping is not for everyone, Dr Ha warned.

Healthy living . . . Dr Amy Ha says it is vital more people in Hong Kong take regular exercise and recommends skipping, which is today's Challenge Day theme.

NEWSPAPER CUTTING

From 新晚報 of 26 MAY 1995

Jump Rope亦學樂無窮

■四角同時揮動四條繩，擺擺方向要一致，好不容易才得出「串花」圖案。

活力知多啲

香港跳繩總會成立於1997年，主要成員為中文大學體育運動科學系的導師和學生。總會不時會到各中學巡迴示範表演作推廣。另外也會和當時市政局和臨時區域市政局合辦活動。

三月七日（星期日），他們將會在香港公園進行示範表演，屆時歡迎各界人士參與，一同跳繩新花式。

安全守則要謹記

跳繩似乎人人都懂，不過當中也有一些要注意的。第一，必須只是前腳掌落地，不可以整隻腳板撞向地，避免衝力傷害腳趾。第二，要有足夠空間擺動繩子，避免傷及他人。

只要注意安全避免危險動作，多些練習和運用創意，便能夠跳出更多更特別的花式。

■用繩子由可做不同的熱身運動，包括有小腿、背肌、腰和手腕等部位。
(後排左起)黃基恩、郭志康、彭芷菁、李蕙霞、江明暉。(前排左起)蘇榮光、馮潔心。

「小皮球、香薰油、哪裏開花一十一……」

有一種運動好好玩，它不限人數，不分季節，無論室內室外都可玩，這就是跳繩 (Jump Rope)。

跳繩挑戰性大

跳繩可以訓練手腳協調和培養靈活性，而且挑戰性很大，可以自創新花式，個人又得，小組亦得。同時器材裝備也很簡單，只要一條繩，穿輕便運動服和波鞋便可。這些都是吸引彭芷菁、李蕙霞和馮潔心參加香港跳繩總會的原因。

雖然表演的花式看起來很複雜，但並不難做到。潔心說：「小學二、三年級的學生也會跳『雙銷繩』、『十字跳』。」芷菁就認為只要多些練習就可跳得好。「加上創意，自己也能創出其他花式。」一個被視為傳統乏味的運動，重新演繹，可以成為新潮流。芷菁說：「從前最棒也只是跳前後交叉繩，現在創出這麼豐富新穎的動作，趣味大增。」
